

In the Specification:

Page 3, revise the paragraph of lines 5-6, to read as follows:

In one aspect of the present invention there is provided an event-based communication system for use by subscribers to the system, said system comprising:

Page 3, revise the paragraph of lines 11-14 to read as follows:

A database residing on said server, said database comprising ~~at least pictures of subscribers to said communication system;~~ information regarding events that have occurred, or are to occur, at a particular time and location, and participated, or to be participated, by a plurality of persons including the subscriber to the event-based communication system, and cross-correlation between said events and participants in said events from among said subscribers,

Page 5, revise the paragraph of lines 1-3 to read as follows:

In another aspect of the present invention, there is provided a method of enabling communication with a person attending or to attend a specific event, the method comprising the steps of:

Page 5, revise the paragraph of lines 4-11 to read as follows:

Providing an event-based communication system comprising a computer-based server, said server running a server software application of said communication system, said server additionally comprising a database residing on said server, said database comprising at least information regarding subscribers to said communication system, information regarding events that have occurred, or are to occur, at a particular time and location, and participated, or to be participated, by a plurality of

persons including the subscriber to the event-based communication system, and
cross-correlation between said events and participants in said events from among said
subscribers,

Page 7, revise the lines of paragraph of lines 15–17 to read as follows:

In a further aspect of the present invention, there is provided a method of
contacting a person attending ~~an~~ or to attend a specific event, the method comprising
the steps of:

Page 7, revise the paragraph beginning on line 18 to read as follows:

Providing an event-based communication system comprising a computer-
based server, said server running a server software application of said communication
system, said server additionally comprising a database residing on said server, said
database comprising at least information regarding events that have occurred, or are to
occur, at a particular time and location, and participated, or to be participated, by a
plurality of persons including the subscriber to the event-based communication
system, and subscribers to said communication system, said information about
subscribers comprising at least pictures or video-clips, information regarding events,
and cross-correlation between said events and participants in said events from among
said subscribers;

Page 9, revise the paragraph of lines 4–7 to read as follows:

In yet another aspect of the present invention there is provided a Contact
Center for communicating between people attending an event ~~and a location-based via~~
an event-based contact server, said server comprising a database, including

information regarding events that have occurred, or are to occur, at a particular time and location, and participated, or to be participated, by a plurality of persons including the subscriber to the event-based communication system, said Contact Center comprising:

Page 10, revise the paragraph of lines 1-3 to read as follows:

In another aspect of the present invention there is provided a method of identifying a person previously located in at least one of a series of locations at which a specific event has occurred, or is to occur, the method comprising the steps of:

Page 1, revise the paragraph of lines 4-12 to read as follows:

Providing an event-based communication system comprising a computer-based server, said server running a server software application of said communication system, said server additionally comprising a database residing on said server, said database comprising at least information regarding events that have occurred, or are to occur, at a particular time and location, and participated, or to be participated, by a plurality of persons including the subscriber to the event-based communication system, and subscribers to said communication system, said information about subscribers comprising at least pictures or video-clips, information regarding events, and cross-correlation between said events and participants in said events from among said subscribers;
